CROPS AS ANTICIPATED

Crops have grown neither smaller nor larger than prospected last fall. Red Clover, Alsike, Alfalfa and Sweet Clover, 25% LESS than normal; White Clover, 40% less than normal, Timothy, about normal; Bluegrass, Redtop, Potatoes, Cowpeas, Soybeans, Sudan, Lespedeza, all considerably above normal.

To the farmer who tells you farming is a poor business, suggest a brief trip to some purely industrial town, like Braddock or Akron, or some mining town. Then, even if cash is short, he will agree with the farmer of the last

hundred years that farming, as a mode of living, can't be beat.

Which weighs the most, a pound of feathers or a pound of gold?

Answer: Seeds bought freight paid cost just as much as those f. o. b. shipping point. No necromancy yet developed voids death, taxes or freight bills.

"Have Hope" folders are available for your friends for the asking.

Every farmer has to buy seed from someone. Your job is to get him to buy it from you for cash.

Trinity Quality is guaranteed.

"A" gave \$45.00 for a horse and sold him for \$54.00. What % profit did he make?

Nineteen hundred and thirty-two is a year when the seed industry can get on that eminently safe and sane basis, cash and carry, that built the Woolworth Tower.

Wheat on the Eastern Shore is wallowing. What will the result be?

TRINITY CLUB members made money in 1931.

"THERE'S A REASON"

Despite all statistics on the per capita consumption of gin, milk is still America's most popular beverage with the exception of water, L. A. Van Bomel, New York, vice-president of the International Association of Milk Dealers, said.

America pays \$3,000,000,000 a year for milk, Van Bomel said. He then pointed out economies in producing milk. In 1925 26,676,000 cows were required to produce 54,000,000,000 quarts of milk. But in 1931 only 22,500,000 cows did produce 60,000,000,000 quarts.
